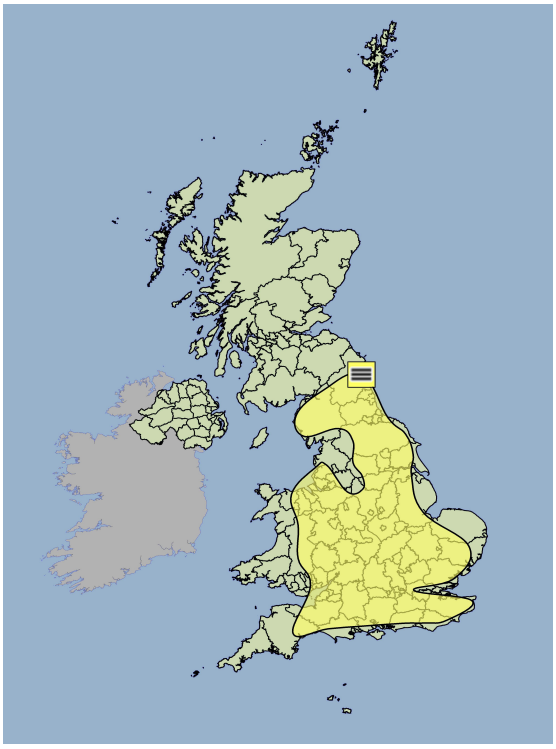
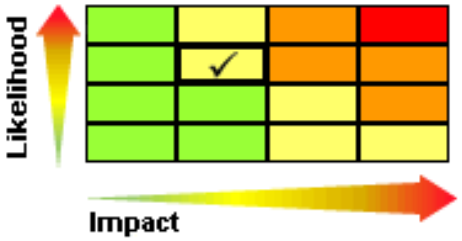
National Severe Weather Warning Service





Chief Forecasters Assessment
A ridge of high pressure across much of the UK has brought clear skies and light winds overnight, a recipe for areas of locally thick fog to develop, which will take until late morning on Saturday to clear in some places.

The Met Office have issued a **Yellow Warning** of **Fog**

Valid from **03:35 on Sat, 03rd Oct 2015** until **11:00 on Sat, 03rd Oct 2015**

Patchy fog is expected to affect parts of England and Wales during the early hours of Saturday, becoming fairly widespread within parts of the warning area by dawn. Not everywhere will see fog, but where it does form the visibility may fall below 100 metres in places, leading to difficult driving conditions. The fog will thin and lift slowly later in the morning.

This is an update to the warning originally issued on Friday to expand the yellow area across more of England and into east Wales.
